Thursday Morning, July 5, 1866.

TO ADVERTISERS.

Transient Advertisements must be paid for in advance to insure insertion.

TO AGENTS.

Settlements of accounts will be required monthly, or the supply of papers will be discontinued. The daily and weekly issues will be furnished at the lowest cash rates, and no exception will in future be made to this rule.

Golden Prospects.

As there is nothing in the world so corrupting as gold, there is nothing that men more willingly worship. It is true, that, like other idols, it can neither hear, feel, move, nor understand; but it can boast of two peculiarities: it is worshipped in all climates without a single temple, and by all classes without a single hypocrite. It would be useless to advise our readers, when they read the telegraphic report which we lay before them to-day, not to become excited. The return of the Aurora and Davis claims is something wonderful. A yield of one thousand and eighty-five ounces—or \$20,000—in the short space of two days, rivals in wealth the wonders of Aladdin's Cave, and eclipses the product of any two claims previously opened in Cariboo. The reports from other claims on Williams Creek are also most encouraging, and the prospects of a large yield of precious metal and a speedy reaction in business, are very bright. On Grouse Creek, a stream distant four miles from Williams Creek and heading in the same mountain, tunnel companies have discovered in the hills a lead of vast extent and great richness; the population is steadily increasing, and the Cariboo *Sentinel* alludes glowingly to the change for the better that has come over that part of the diggings. The newly discovered diggings on Canon Creek continue to attract attention, and crowds of miners are on their way thitherward. From Big Bend the news is not encouraging; but sufficient is known to justify the statement that gold exists there in payable quantities, and that claims require but to be opened to insure at least a moderate return for the capital and labor invested. Taken all in all, we do not remember a season when the prospects have been so cheering—when miners were so confident and unanimous as to the result of the season's work—when there was manifested less timid eagerness to acquire wealth in the country and hurry away with it to another land to spend it. Few men who enter a new country with the full expectation that in a few months, or years at most, they will have acquired fortunes, even realize their dream. As a general rule, it is the plodding man who succeeds in gold countries as well as elsewhere. A man should divest his mind of all idea of becoming suddenly rich; he should make every preparation for a lengthened residence in the country; he should act as though he intended to remain here for the remainder of his days, and he must settle in his mind as well as in his body. These are the kind of men who are desirable citizens, and whose presence here should be encouraged. It is gratifying to know that the character of our miners is less migratory than before. Experience has taught them that to be successful in gold mining they must do something more than scratch along the surface or rely entirely upon a lucky "find" to bring them riches; that they must dig and delve and make a business of the occupation to ensure them prosperity. Fully impressed with these thoughts the miners have gone to work this spring and are slowly but surely opening up the rich mines of wealth that abound in the Cariboo country. The number of diggers, though small, forms the nucleus for a large and permanent population which will be attracted to our shores when the result of this year's mining hall have been sent abroad.

By Electric Telegraph

SPECIAL TO THE COLONIST AND CHRONICLE.

MARVELOUS YIELD OF THE AURORA AND DAVIS CLAIMS.

GOOD NEWS FROM GROUSE CREEK!

QUESNELLOMOUTH, July 3.—The *Sentinel* of June 28th, says:—The Petty Court was held on the 22d. Ah Sue, was charged by H. H. Margesson with having in his possession a special receipt from the Bank of British North America, for \$750, which was lost or stolen on Saturday, the 16th, from complainant. After being locked up 24 hours, the friends of the prisoner brought the pocket book and papers, and delivered them up. The prisoner was cautioned and dismissed. Some Chinamen were arrested on suspicion of having robbed the sluices of the Chittenden Mining Co., on Lower Creek.

The surplus fund remaining in the hands of the committee who collected the subscription for the testimonial to Judge Cox, amounting to \$227.50, was generously bestowed on the Sisters of Charity of Victoria, and sent by last express to be applied towards the maintenance of two children of Mr. Winnard, sent from here to their care, over a year ago.

The *Sentinel* of July 2d, says:—

While a man named John Garrison, was crossing a log, on Friday last, at Grouse Creek, his foot slipped, and he fell on a sharp limb of a tree, receiving a very severe cut on the arm.

A man named John Chisholm, while at work in the Cayote and Crane claim, on Saturday last, had his leg badly bruised by the caving in of a bank.

On the same day another man named John Muir, in the Vaughan-Sweeny claim, marvellously escaped being killed by a similar caving.

Mr. Lee, who had his leg broken

near the Blue Tent House, two months ago, got in on Saturday.

Since our last visit to Grouse creek, the population has increased from 100 to 240, and claims that were then only being prospected are now yielding large returns. All this has happened within a month. Within the last eight days the excitement has increased in consequence of some new developments, and the creek has been staked off for two or three miles.

It is the opinion of miners well acquainted with the country, that the lead will continue straight into Antler creek. This creek supplies a desideratum which has long been wanting in the country, namely:—The mines are easy of access to those of limited means. The Discovery Co. are taking out their usual pay, three or four ounces a day to the hand.

There are 11 or 12 companies at work on this creek—some taking out good pay.

During the past week there has been a very perceptible increase in the yield of gold from the various claims on Williams Creek, which is likely to continue throughout the season. The Aurora Co. washed up on Thursday 219 ounces and yesterday 350 ounces. The Davis washed up for the week about 387 ounces. These amounts—being 1085 ounces—are out of the disputed ground and will be divided between the two companies. The Never Sweat Co. washed out for the week \$800. They are just getting into pay.

Quesnelmouth, July 3.—Still good news from Canon Creek. Boats are being loaded and starting daily up the river for this creek.

A ball is arranged for the evening of the Fourth, at the Fashion Hotel in this town; a gay time is anticipated.

The weather for three days has been extremely warm, and almost suffocating—the thermometer rising as high as 95° in the shade.

The telegraph line is now completed to Fraser Lake, 190 miles, and the chopping party are some way ahead. The work is being pushed on vigorously and it is expected the line will be stretched to Rocher du Boulard, on the Skeena River, by the first of August. Parties are exploring the Skeena river, and it is hoped the Skeena can be crossed a short distance from the coast. Over 250 pack animals are employed transporting wire and supplies. About 100 pack animals and the same number of beef cattle leaves here to-morrow for Fraser Lake. The boats have already made two trips to Fort Fraser and Nakesta.

EUROPEAN ITEMS.

The restoration of Notre Dame is rapidly approaching its termination. All stained glass windows have been completed and placed in the ogive opening; the northern portion is furnished, as are the chapels surrounding the nave. By the end of this year the old cathedral will once more appear in its pristine beauty.

A ball has been introduced in the English Parliament to amend the Public Libraries Act, the purport of which is to sanction the formation of a public library, on the assent of one half, instead of as now two-thirds of the inhabitants of the borough, and to permit adjoining parishes to unite with a borough in adopting the Act.

Recent experiments conducted by the French Government show that the water-tanks on board ship should be iron-coated inside with tin, and not of galvanized iron, as at present. It was discovered that the water, under certain various conditions, dissolved the zinc off the iron, and rendered it injurious to health.

Notwithstanding the numerous de- flections from the Society for the Translation of the Bible, the plan has not been abandoned, and a committee consisting of an equal number of Protestant clergymen, Jewish rabbis and Roman Catholic priests, has been appointed to begin the work.

An instance of extraordinary longevity has happened at Cambridge, England, in the death of a Mrs. James Hopkins, in her 103d year. She was born at Brandon, in Suffolk, and resided for the last 48 years at Cambridge.

In pursuance of an order of the magistrates, 80 homeless and unclaimed dogs were recently captured by the Manchester police and taken to the Town's Yard, where they were destroyed by poison.

The late Martin, the head gamekeeper to the late Lord Palmerston, died recently at the age of 80. He had been 40 years in the service of his lordship, and was much esteemed by him.

The agricultural laborers on some of the largest farms in Berkshire, England, have struck for an advance of 1s. per week. Their present pay is 9s. per week!

Two persons were married recently in England, whose united ages amounts to 140 years; and it was the bride's third appearance at the altar.

A laborer named James Murray recently died at Charlton from exhaustion through loss of blood, caused by the extraction of a diseased tooth.

Decidedly an attempt will be made to construct a tunnel from Calais to Dover. A body of engineers, under the direction of M. Thome de Gamond, have already arrived at Boulogne.

The new Irish Marriage Bill proposes that all marriages shall be equally legal, whether performed by a clergyman of the established Church or a Roman Catholic priest.

The Marquis de Boissy is so indignant at the refusal of the hanging com-

mittee of the French Academy to exhibit his portrait that he threatens to exhibit it in public himself.

Mrs. Carlyle, wife of Thomas Carlyle, the philosopher, died suddenly recently in her carriage in Hyde Park.

The Leamington Courier states that the Congregationalists of that town have opened a perfectly free church for the benefit of the working classes. The building was formerly used as a theatre.

CAUSALTY ON LAKE ONTARIO.—The schooner Corse, Capt. Faulkner, left Hamilton, C. W., on Wednesday afternoon, May 2d, for that port. When off Oakville, some 20 miles below Hamilton, and 15 miles from the wind blowing fresh, the man at the masthead discovered a boat, and sent out according. The schooner was brought to, and John McLean, first mate, and his seaman, lowered away in the boat and made for the object. In it were two boys and girl. The boy seemed to be still alive, though in an exhausted condition, while the girl was dead. They were all taken on board the Corse, who, after resorting to the usual methods of restoring animation, and after the lapse of four or five hours, the boy was enabled to give some account of themselves. The boy's names are John and James Welsh, and they live with their parents near Oakville. On Wednesday morning five children, all of the same family—two boys, aged 15 and 13 years, and three girls, aged respectively 11, 9 and 7 years, got into a boat at Oakville, and the wind took them off to sea. The further they got from the shore the rougher was the sea, and to make matters worse, the boat leaked badly. By hard work the boys managed to keep her afloat and right side up until two or three o'clock on Wednesday afternoon, when she capsized and went clean over. The two youngest girls were drowned here. The other girl and boys clung to the boat, and righted her. The boy says the boat went over three times in the same manner in the morning, and they righted her each time. They saw these vessels pass near them during the morning, but they had no means of making signals, and probably were not seen. When found, the girl sat in the bottom of the boat, her body reclining against a board used for a seat, and her hands clenched with the grip of death on the oarlock.—*Quebec Republican*.

A situation by a respectable girl, 16 years of age, waiting and maid children. Is willing to make her home generally. Any family requiring such a person will please address "J. O." office of this paper.

The San Juan Excursion.

The steamer Alexandra, with about 500 passengers, started yesterday morning at 9:30 o'clock for the American Post on San Juan Island, where it was designed to hold a picnic in honor of the day. All on board appeared to enter into the arrangement with a keen relish, and the day was one of the most beautiful of the season. The run to San Juan was made in 2½ hours, the company, meanwhile, engaging in dances and song to the music of a coalition band. On arriving at the island, a large proportion of the passengers were landed in boats and canoes. A report having been brought to the steamer that Captain Gray, of the American garrison, did not wish the party to land there, Messrs. Trounce and Felt, of the committee, landed and ascertained that the settlers had subscribed a purse of \$180 the day before for the purpose of providing some enjoyment, when a peremptory order came from Captain Gray, informing them that he would allow no demonstration or amusement by the settlers or the garrison. The Committee of the Institute, intensely disgusted at this information, returned to the beach with the intention of re-embarking and seeking some more hospitable spot to land on the island, but finding that the passengers had mostly dispersed among the groves, the intention could not be carried out. Dinner was served at 2 o'clock on board the steamer, and at 3 o'clock she steamed off for a cruise with about 70 of the passengers. At five o'clock, when the steamer returned to the wharf, the passengers proceeded aboard. Three groans were given for Capt. Gray by the picnickers as the boat moved off. The settlers appeared to be as much displeased at the conduct of the officer of the garrison as were the excursionists. The trip back was enlivened by dancing, until, at 9:30 o'clock, the steamer reached the wharf, as she approached which a salute was fired from guns placed on a sloop off the Hudson Bay Company's wharf. The courteous course pursued by Capt. Gray is difficult to account for; a gentleman who gained access to the garrison informs us that no notice or intimation of the affair was received by the Captain previous to the steamer heaving in sight of the camp. But we are credibly informed that the Committee of the Mechanics' Institute waited upon the American Consul a week ago, and requested that functionary to notify Capt. Gray of the intended excursion, which the Consul afterwards said had been done. The entire company unite in denouncing Capt. Gray's behavior, but speak well of his officers and men and the settlers. Deep regret is expressed that the excursionists did not proceed on to the English Garrison and pass the day there. The Alexandra and her officers have completed satisfaction.

FOURTH OF JULY.—The national salute fired by the American residents from a sloop anchored off Lang's ship yard, awoke the echoes and the slumbering people at sunrise yesterday morning. Those who had forgotten that the Fourth of July was at hand, hurried on their clothes, under the impression that the Fenians were bombarding the town; but the peaceful nature of the firing was soon ascertained. Bro. Jonathan's children burned the powder in 30 discharges without eliciting a response from the Britishers on shore. Bunting was displayed, from most of the flagstaffs and the shipping, and in some instances the banner of St. George and the Star and Stripes waved affectionately side by side, from the same hullards. All the business houses, and the Supreme Court were closed, and men, women, and children gave themselves up to the enjoyments of a holiday. Pic-nics were well patronized, and the only drawback to the festivities was the unpleasant wind that prevailed during the afternoon.

THE DEPUTATION.—Messrs McLaren and Laumeister, who were deputed to present a memorial from the Cariboo miners, praying for the removal of Chief Justice Begbie, or the establishment of a Court of Appeal, have reached New Westminster, and placed the memorial in the hands of Mr. Birch. No answer had been received by the deputation up to 10 o'clock on Tuesday morning. The removal part of the memorial is inoperative. Mr. Birch has not the power to carry it out, and we do not believe that he would exercise it in the formation of a Court of Appeal is a different affair, and one that will, no doubt, receive due consideration when the Legislative Council shall again assemble.

CENTRAL SCHOOL—GIRLS' DEPARTMENT.—The examination at the Girls' School, under the superintendence of Mrs. Fisher, will commence this morning, and continue until about 3 o'clock in the afternoon. The fair sex are generally favored with a larger attendance of visitors than usually fall to the lot of the sterner mould, and we anticipate the presence of many friends. Among the members of the Board of Education present at Tuesday's examination was W. J. Macdonald, Esq., who remained during the greater part of the day.

THE "ALERT!" TAKEN!—On Wednesday, H. M. S. Alert was taken without resistance on the part of her officers and crew, who are believed to have left themselves to the plot. The ship was lying at anchor in Esquimalt harbour when the affair occurred, and the time chosen by the enemy was noon-day. The captor was Mr. Robinson the Photographer, and the only weapons he used in effecting his object were a Camera, and a bit of glass.

"HIVOT SULLOCKS!"—The tribe of Indians at Quayloquay Sound, to which Maggie Sullock—the little Indian orphan girl, who was adopted by Mrs. Denman, during the Indian war in 1864—have arrived at Esquimalt, and are greatly displeased at the death of the child. They demand a gift of a number of blankets to allay their wrath.

PHOTOGRAPHS.—Mr. Daily's photographic gallery, Fort street, is now open to the public. He has received by latest steamer, everything necessary to the successful carrying on of the art, and will guarantee to those who may patronize him pictures giving the utmost satisfaction.

At the election of officers for Victoria Lodge No. 1, I. O. O. F., held last Monday evening, the following members were elected for the ensuing term: E. C. Holden, N. G.; F. S. F. S.; T. H. Hammond, P. S.; E. R. Thomas, Tres. (re-elected).

NAVAL.—H. M. S. Alert is under orders for the Coast of Mexico, and will sail immediately upon the arrival of the next mail. H. M. S. Scout will be inspected by the Admirals to-day.

Dr. Coot, Dentist, will be here in a week or ten days, when parties wishing to secure his services, will have an opportunity of consulting him.

THE NEW BONNETS, just arrived at London House, are really the most beautiful we have yet seen. Both in design and price they are unsurpassed this season.

ELEGANT SUMMER COSTUME.—The Gabriell Linen Dress and Cossack. A beautiful assort ment of these graceful garments, just opened at London House.

FROM NANAIMO.—The steamer Emily Harris arrived from Nanaimo yesterday morning. Preparations are on foot on Tuesday for a grand picnic on the Fourth.

THE ALEXANDRA.—This steamer will leave tomorrow for New Westminster, and will return on Saturday evening. She will carry a fair freight.

COAL EXPORTS.—The exports of coal from Nanaimo for the month ending June 30, reached 1420 tons.

THE GROWLER.—The schooner Growler arrived from the American side yesterday with a full cargo of lumber and Sound produce.

THE WIRE.—The wire remained down south of Seattle yesterday.

THE FIDELITER.—The Fideliter will sail for Portland ten o'clock this morning.

THE BANKS.—Were closed at noon yesterday, and the employees enjoyed a half holiday.

CHIEF JUSTICE BEGBIE'S AWARD.

The British Columbia Tribune publishes the following as Chief Justice Begbie's award in the Aurora vs Davis suit:—"Declare mutual release of all past acts. Define the disputed territory by producing the S. boundary of the Harvey-Dixon claim 100 ft up the hill, thence draw a line northwards, parallel to the Eastern bounds of the Harvey-Dixon; such line to be the eastern boundary of the disputed territory. There being at the commencement of the action 24 full interests in the Davis Co., the owners of which were not members at the time of the jump, 12th August, 1864, and may therefore be taken to have been bona-fide members, and 24 interests belonging to members cognizant of the jump, 12th of August, 1864, and 14 full interests in the Aurora Co.; divide the whole of the unworked portion of the disputed territory into 19 equal parts; 5½ to belong to the said bona-fide members of the Davis Co., 14 portions to the Aurora Co., nothing to the owners of the 24 interests in Davis Co., who were parties to the jump, except indemnity and forgiveness for the past. Each party to pay their own costs, ab initio. Costs of the receiver in Commissioner's Court to be paid by both companies equally. Unless the parties can agree without a Surveyor, let a Surveyor be appointed jointly, to fix the posts on the surface, both for the E. boundary of the disputed territory and for the dividing line between plaintiffs' 5½ and the defendants' 14 parts. If parties agree on one Surveyor, each to pay half expenses of survey. If they cannot agree each to appoint and pay their own Surveyor. After division, parties to execute mutual release and quit claims, to be settled by Court if parties differ. Recommend that the residue be worked in common. Reserve power to give directions for carrying out this award which is to be made a rule of Court.

A NEW AND GRAND EPOCH IN MEDICINE!—Dr. Maggiel is the founder of a new Medical System! The quantitarians, whose vast interest does not extend to the stomach and bowels, must give precedence to the new system, which is based, with from two to three hundred ordinary pills and a few compound ones with a box or so of his wonderful and all healing Salve. These two great specifics of the Doctor are far exceeding all the accepted notions of the past. Extraneous to the system, and the author has opened the eyes of the public to the inefficacy of the (so-called) remedies of others, and upon which perhaps so many have been imposed. The new system is the result that are swallowed by the dozen, and of which every box fallen creates an absolute necessity for another. One or two of Maggiel's Pills suffice to cure any disorder, and render the spirits light and buoyant; create an appetite, and render the spirits light and buoyant; cure a headache, and render the spirits light and buoyant; and so on. The new system, when it is invigorated, this last quality makes the medicines very desirable for the wants of delicate females. Ulcerous and eruptive diseases are cured by the use of Dr. Maggiel's Salve, and of the pills that are swallowed by the dozen, and of which every box fallen creates an absolute necessity for another. One or two of Maggiel's Pills suffice to cure any disorder, and render the spirits light and buoyant; create an appetite, and render the spirits light and buoyant; cure a headache, and render the spirits light and buoyant; and so on.

A portion of Section 71, Victoria District, commencing at a point distant 377 feet from the corner of Pemberton street and Fort street; running thence in a northeasterly direction, and fronting on Fort street 100 feet; thence backwards 370 feet; thence in a westerly direction 100 feet; thence to the place of beginning 324 feet.

Also, that valuable business lot in Store street, forming part of the premises occupied by Messrs Sroat & Co., being part of Town Lot No. 182 D upon the Official Map, commencing at a point on the westerly side of Store street, 60 feet north of the southeast corner of said Lot 182 D; thence running easterly along the westerly line of Store street 30 feet; thence running westwardly and parallel with said southern line of Lot 182 D, until the line so drawn reaches the Bay to a point to which a line drawn parallel with said southern boundary line of Lot 182 D, will strike the point of commencement, and thence easterly and parallel with said southern line of Lot 182 D, to the point of commencement; leased to Messrs Anderson & Co. at \$50 per month.
